

Georgetown Charter Township Water/Sewer Committee Minutes

February 20, 2007

Present: Carlton, Mohr & Sterk (Members)

Maplewood Area Sewer Discussion

The committee recommends to the Township Board to notify the affected residents of the Township's intent to install sewer in 6 areas around Maplewood Lake (See attached map for areas). The sewer would be installed on a deferred basis (property owners would not have to pay unless they connect to the sewer). Property owners would be given the option to petition the Township to stop the project. If the majority of the owners of a district petition the township to stop the project, the Township won't proceed at this time in that district. Each property owner would be mailed a notice that would include the following information.

- That if the majority of the owners petition the Township by April 2 to stop the project the Township won't proceed at this time.
- The sewer would be installed on a deferred basis. The 2007 fee is below what the sewer would cost.
- The sewer installation would be a long term solution to septic systems; however it may not solve the e-coli problem in Maplewood Lake.

Ice Arena Phone System

The committee recommends authorizing a maximum of \$10,000 for purchasing a phone system at the arena compatible with the Township Office. The phone system would allow daytime calls to be answered by township staff when ice arena staff is not available. Township office staff could assist people with questions such as public skate times and programs.

Meadowood Street complaint

The committee reviewed the unsigned letter from Meadowood Dr.

Sewer Repairs on Baldwin St

The committee reviewed the emergency repairs on the Baldwin St Sewer line.

Baldwin Street Lights

The committee would like to see more information on the proposed Baldwin St street lights.
