Director of Public Works  
Georgetown Charter Township  
PO Box 769  
Jenison, MI 49426

RE: Water Supply System Proposal

Dear Mr. Bishop:

In accordance with your request, we are providing the following quotes for the township's consideration:

- 1) Update the Reliability Study: the latest study is dated August 2003 which requires an update around August 2008. As proposed in our May 10, 2006 letter we will complete this for \$5,000.00.
- 2) Analyze/study the Baldwin Street booster station (this will be in conjunction with the Reliability Study update):

It is our understanding that the Township is interested in replacing the natural gas pump, upsizing/upgrading all three pumps complete with variable frequency drives, and adding an on-site generator. Also, we will assist in the determination of the location for additional high pressure system storage. Our proposed fee is \$7,000.00 (this excludes construction drawings and administration).

Upon approval of the recommendation, we will proceed with the construction drawings when directed to do so by the township.

Thank you for this opportunity to provide our services to Georgetown Charter Township.

Sincerely,

Prein&Newhof

  
Philip C. Glupker, P.E.
