To Whom It May Concern,

On behalf of Golden Hour Farm, I am pleased to provide this Letter of Support to WORMIES as it pursues a continued lease at 1364 Maplewood Drive. As farmers, we are committed to collaborating with WORMIES to develop their vision for community service and organic composting in West Michigan.

We understand the barriers to land access for farmers as well as healthy food for those less fortunate in our community. We are supportive of and aligned with their mission to improve organic waste management and farming practices through the vermicompost process, education and community building. And we recognize that this mission would not be possible without the support of this local community.

We are uniquely qualified because we have worked well with Luis and his crew in sharing the land at 1364 Maplewood Dr. I have personally worked with Luis for years before WORMIES existed. He is a person of integrity and vision for his business and community. We are passionate about their work. Their mission aligns with our values of providing the highest quality local agricultural products to our communities. Our partnership is essential for the sustainability of the farmland and for the betterment of Jenison and greater Grand Rapids.

Golden Hour Farm is enthusiastic about working with WORMIES moving forward. Please do not hesitate to contact me at goldenhourfarm616@gmail.com if you have any questions.

Sincerely,

Scott Townley
Owner, Co-Founder
