Subject: Kenowa Water Line

Mr. Carlton,

I live at 5021 Kenowa Ave. I had talked to you and Joel H over a year ago about city water service to my house. I am just reaching out to see if there are any plans to further develop the line there. I see there was another failure on the plastic line 100' from my property line to the north. Any chance it could be extended to me while the bike path is already ripped up? Also, I hear there is another development on 4th ave behind me in the works and Joel had mentioned that someday the "loop" would be done down Jackson to Kenowa and up to Barry.

Our well water on Kenowa is lousy, I'm spending \$20.00 a month on salt and considering installing a more extensive treatment system. My neighbor to the south says his well is failing and is poor quality also.

Thanks in advance for your consideration.
