**Subject:** 8th Ave. Park bridge

I have walked at the 8th Ave. Park everyday for the last 5 years. The township recently removed the handrail from one of the wooden bridges. The wood on the bridges gets slippery when it is wet, icy or snowy. I am a senior citizen and hold the rails when I feel unsteady due to these conditions. I will not only fall if I slip, I could also go into the water because there is no barrier to stop me. Could you please replace these handrails? I am concerned for my safety.

Thank you,
